

AMMO PLACARD

1. Notional ammunition cards are used by the Wolf team during force-on-force. Each PLS flat-rack will have a notional ammunition card to represent the ammunition being hauled. The card is initialed when a PLS arrives at the ASP. Based on the unit's combat configuration, load plans, and CSR. Wolf 10 will fill-out the cards appropriately and give it to the PLS driver. When a PLS arrives in a firing battery's position and the unit begins to transload ammo into the howitzer or CAT-V/M548S the OC on site will subtract the total amount of ammunition removed from the flat-rack and initial with his call sign on the appropriate block on the card. The total count of ammo received by the unit will be given to the team A/B for further ammunition tracking and use.
